

MEMORANDUM

Date: February 20, 1985
To: RCRA Files
From: Patt O'Flaherty *PO*
Subject: RCRA - WASTE HAULERS 103c NOTIFICATION

USEPA SF

1580957

When completing PAs on local landfills, we have discovered that waste haulers including Bayside, Sno-King, and others have listed several categories of hazardous materials as being a component of their transport. Based on this, the FIT contractor has often given a landfill a high preliminary hazard score or reported concern for these sites. It is important, however, to read the disclaimer that these waste haulers have also attached to their 103(c) forms which in essence states that the hauler did not knowingly carry hazardous wastes. Thus the checked waste categories are merely an acknowledgement that these wastes would have been unknowingly carried.

This is not a confirmation that hazardous wastes occur in a landfill. Therefore, I recommend that unless other documentation occurs attributing hazardous wastes/materials, you should consider this 103(c) as solely a notice that these companies made a delivery to the site, and that hazardous wastes were not a component.

To: Environmental Protection Agency
 From: Bayside Disposal Company
 Subject: Notification of Hazardous Waste Sites

The facilities listed on the attached maps are, to the best of our knowledge, all of the facilities to which this company has at sometime transported for disposal, material that could have included material now defined as hazardous waste by the E.P.A.

Unless expressly stated otherwise, such listing does not represent that this firm has transported any particular type or quantity of hazardous waste. Nor does such listing in any way represent or imply that this firm has at any time transported or delivered for disposal any hazardous waste in any manner not fully consistent with all Federal, State or local requirements applicable at the relevant time.
